Helping you decide

The vast range of our products can be a bit overwhelming when decisions have to be made. This brochure gives a clear overview of the design families, applications, individual products and their features. Lockability, inside or outside use, and specific safety classifications can all be found in the tables on the right pages.

Your last decision is the colour and/or finish:

Powdercoating is available in 400+ combinations of RAL colours in 4 variations of finishes or textures: gloss, matt, satin, coatex (textured). Textured paint has the benefit of being less sensitive to scratches.

We also offer 9 **anodised** colours, ranging from the lightest natural colour, over several shades of champagne, gold and bronze, all the way to black.

In both handles and door pulls we also offer a range of **stainless steel** finishes. This pure material has proven to be more hygienic in everyday use.

For projects, we also offer the possibility to add an **anti-microbial** coating to our handles. This can be combined with all available finishes, and does not affect its appearance.

For the surface treatment of the our handles, we collaborate with selected painting companies that strictly adhere to our standards. Some even comply with regulations like Qualicoat and Qualanod.

Contour

Modern safety

Contour is our new range of robust stainless steel handles in a fresh and modern design to meet even the stringest durability and safety demands. Contour is compatible with most systems and opening types such as SlimLine 38, MasterLine 8 and 10, ConceptPatio 130 and ConceptPatio 155 and MasterPatio.

Material

Contour handles are made of stainless steel AISI 304 which is very durable and highly resistant to corrosion. The robust stainless steel in this handle range is not only protection from burglar attacks, the clean and pure material is easy to maintain, resistant to cleaning products, and therefore often the material of choice in demanding environments like hospitals. The fact that stainless steel is recyclable makes Contour handles a sustainable choice!

Design

The Contour range meets all requirements for a modern or contemporary home. Their timeless design and high quality add value to the property and give a feel of luxury, without compromising on functionality.

Safety

Contour handles contribute to your safety. Most of the handles have an SKG** or even SKG*** classification and are applicable on Reynaers Certified RC2 systems, which means they are highly resistant against burglar attacks.

Colours

AVAILABLE COLOURS

Contour handles are available in stainless steel only.

A. Standard Handle

Touch

Timeless and versatile

Style and quality are combined in Touch, our trendsetting range of design hardware. Touch is sleek, elegant and slim hardware, suitable for windows, doors, sliding and folding doors.

The sleek design fits perfectly into modern homes, but also provides a stylish contrast in renovations.

Material and finish

The Touch handles and cup handles are produced with carefully selected, high-end materials. Most handles can be powder coated in over 400 RAL-colours, in a matt, glossy or coatex surface finish or anodised in various tones. This way, we ensure a perfect match with the profiles of the window.

Design

Style and quality are combined in Touch, a trendsetting range of design hardware from Reynaers Aluminium. Touch offers sleek, elegant and slim hardware, suitable for windows, doors, sliding and folding doors. The sleek design fits perfectly into modern homes, but also provides a stylish contrast in renovations.

Safety

The Touch Security handles and cup handles are burglar proof. Door handles are fitted with a long shield in solid aluminium, making the cylinder almost impossible to access, and even harder to break.

Horizon

Contemporary renovation

Looking for new horizons, that's the ultimate goal of just about everyone who starts building or renovating. The Horizon handles merge, almost invisibly, into a window. As a result, they fit perfectly with all possible architectural styles.

Material

Horizon is built from molded or air pressed aluminium. By using pure material the handle range has a wider variety of finishes.

Design

With a sleek design Horizon handles make the perfect combination for any window or door system.

Installation

The Horizon range has been a consistent companion for Reynaers profiles throughout the years. This allround, low entry handle range has a solution for every opening type, whether it is as simple as a window or as specific as a panic door.

Olimpo

Affordable design

The Olimpo combines a distinct look with affordability. The smooth lines are available in lockable and standard variants, and can be enhanced by the many finishes available, which contribute to meet the highest quality and aesthetical requirements.

Material

The Olimpo handle combines technical solutions of high quality with valuable materials. Available in a wide range of powder-coated, anodized and pvd finishes. Also available in the mill-finished version for an easy assembly with no need for any special tooling.

Design

The smooth shape of the handles is enhanced by the many finishes available which contribute to meet the highest quality and aesthetical requirements.

Olimpo is available for most configurations in standard and lockable variants, and also includes a roseless design.

DoorPulls

A great first impression

A door pull is mostly used for entrance doors. It plays a crucial part in the first impression someone has of the building, the first physical connection that is made before entering.

Material

The door pulls are made of aluminium, with exception of the DoorPull Round, which is in stainless steel. This means our door pulls are available in every finish we have in our product range, as to complement your entrance doors perfectly.

Design

We made sure that they are available in many design variations, making it easy to find the one that best fits the character of your project. Short or long, thick or thin, round or square, we have them in every imaginable finish. You can even integrate complementary products, like our fingerprint scanner.

The system design makes it possible to easily adjust the full door height profiles to the required length, considerably reducing the delivery times compared to bespoke solutions.

The door pulls range enables us to be your one-stop shop for entrance doors, the one place for buying all components from the system, over panels, to locks and hardware.

* Even numbers are individually packed articles

Uneven numbers have 2x the same even article in 1 package.

** Distance between screw holes is variable, because the handle profiles can be cut to any size.

A. DoorPull HiFinity

375 mm

B. DoorPull HiFinity Fin

4000 mm
